- Microsoft
- Devops

## Programming Language

Java (SE & EE)

HTML, CSS, Javascript

Angular

Bootstrap

PHP

python

## DevOps

Docker

Jenkins

Git

## Experience

2023

Univen Project

### Booking System

Developed a full functional platform that worked as an booking center for students, staff and practitioners.

with the team of 3, I was a full stack developer and Ui designer, the system still in the process but scheduled to be done in December 2023. using Angular, Html, CS5, Bootstrap and Angular for frontend, and java springboot for backend.

2021

theboxlab I Makhado

### Crowdfunding platform

"theBoxlab is the crowdfunding and incubation platform for startups. Business Funders participate in groundbreaking innovations, promising companies, and ideas that write history through fundraising. it involves a paymentgateway as the source of recieving a funding to the founders. we used PHP 8 and mysql and aws server to keep the records safe"

- <https://theboxlab.net/>

2023

Online Voting system | Univen Project

### Springboot and Angular

Using Springboot to build a restful api's that was used as our backend to connect with the frontend that was build by Angular 16, database used was Microsoft Azure, me and my team we managed to build a full working system where students were able to vote and view the results to conclude their leading members

- due to confidentiality i can't provide github link
